Welcome!
In this session, we will take a look at the various widgets in the D2L Homepage.

This is the D2L homepage. The top links in the green navigation bar are system wide links and not specific to a course.

This is the My Settings widget.
You can click the Profile link to provide some information about yourself.

The Updates widget will update you with any additions to your account, since the last time you logged in. For example, it will let you know if you have any new emails.

The User Documentation Widget has links for support in the use of D2L.
The News widget in the My Home page has Global announcements concerning the D2L system.

The My Courses Widget lists the courses that you as an instructor have taught or are teaching.

The course list can be collapsed or expanded by clicking the small + and - button.
This completes a walk through the D2L homepage.

THANK YOU!

Thanks to Mr. Jim Ellis for audio support.
